

AG 170L: Introduction to Commercial Aquaponics Laboratory

Companion course to AG 170 Applied Aquaponics. The course will provide students with a hands-on application of the major biological concepts using an aquaponics system as a model ecosystem. Additionally, the course will follow standard operating procedures of large scale aquaponics systems in relation to food safety and production. (Formerly AG197L)

Credits: 1

Co-Requisites: AG 170

Program: [Plant, Biology, and Tropical Agriculture](#)

Recommended Prep: ENG 22, ENG 24, ENG 24C
