

## IIT 281: Supervisory Control and Data Acquisition (scada) Systems

This course introduces students to Supervisory Control and Data Acquisition (SCADA) Systems concepts, including basic architecture and technology. This course includes how SCADA software is configured, programmed and networked. Students will program SCADA software, integrate input/output devices, networking, and communication configurations.

Credits: 4

Prerequisites: IIT 221 with a grade of C or better.

Program: [Integrated Industrial Technology](#)
